How To Save Big Money With High Quality Clone Golf Clubs

Introduction

Many Clone Golf Club manufacturers currently flood the Golf Markets. They claim that their Custom Clone Golf Clubs look and play as well as the top brand equivalents from Callaway, Taylor Made, Ping, Nike, Cleveland and others, but at a much lower price. But how good are Clone Golf Clubs? Do they really perform similar than their famous brothers?

This report should give you the answers and help you to understand the concept behind Clone Golf Clubs. Further it provides you with tips on how choosing the best quality Clone Golf Clubs and where to buy them at the lowest discount prices.

The Clone Golf Club Concept

The clone concept is very well known in many areas like Computers, Medicine (generic medicinal products), Car parts, TVs and other areas. In most cases you get a similar quality but pay much less. The Clone Golf Club concept is nearly the same. Clone Golf Club Manufacturer produce Golf Clubs that play and look similar to top brand Golf Clubs and offer them at much lower prices.

The real question is: **How good are Clone Golf Clubs really** and how do they behave compared to top brand names? Why can they be sold at discounts up to 70-80%?

Why can Clone Golf Club manufacturer sell at such low discount prices?

The difference is very low marketing and advertising costs. The cost spent for development of new products and materials is a fraction of the marketing budget which is required to promote the top brand products. Did you know that 70% of the retail price of a top brand Golf Club is used for advertising and brand name development costs? This also includes sponsoring of PGA Tour Pros. The internet is the perfect distribution channel for factory-direct Golf manufacturer. No expensive fancy retail shops and no middlemen result in much lower prices.

How To Save Big Money With High Quality Clone Golf Clubs

Tips What to consider if buying Clone Golf Clubs

Buy only **from Industry leader Golf Club Manufacturers** that have a long experience and only use high-quality materials (e.g. shafts from leading companies like True Temper, Graffaloy, Aldila). The shaft is the most important part of a Golf Club. Choosing a high quality shafts makes the difference in performance.

Buy only from Golf Shops that provide **Custom Fitting**. The leading Clone Golf Club provider offer free Custom Fitting. Custom Fitting Wizards and Tables help you choosing the Clubs which fit perfectly your physique (right shaft flex and length, correct grip size).

Prefer Clone Golf Club Providers that have a **100% Money Back Guarantee** within 30 days. The internet is the perfect distribution channel for factory-direct Golf manufacturer. You will get new Clubs at the lowest prices directly shipped to your home.

What Type of Golfers can play with Clones?

Clone Golf Clubs are a great choice for people who are looking for a great price value ratio. If buying at the right Golf Shops (see our recommendations below) you can get high quality Golf Clubs at a discount up to 80% compared to top brand names.

Clone Golf Clubs are available for all type of Golfers from single handicap to social Golfers.

Clone Golf Clubs are not for you if you attach importance to brand names. Clone Golf Clubs look very similar to their top brand equivalents but have different names. If you prefer to impress people by the name of your clubs and not with the quality of your game then clones are not for you.

However if you want to save big money and do not attach importance to the name of your Golf Clubs then Clone Golf Clubs are the perfect choice.

How To Save Big Money With High Quality Clone Golf Clubs

Where to buy Clone Golf Clubs

We tested many Golf Shops and based on our experience we can recommend the following Internet Golf Shops for buying Clone Golf Clubs:

[GigaGolf](#)

GigaGolf's commitment is to offer the latest in golf technology at affordable prices. GigaGolf knows that not every Golfer is able to customize their clubs to best suit their swing speed and physique. That is why they have developed the eFit system. The eFit system is a simple four step process that takes your swing speed and three physical measurements and translates them into custom clubs that fit the way you should swing.

Pros:

- A wide selection of Clubs always ready to compete with the latest innovations from the top brands
- Great quality and customer service. We ordered last week a set of Lady Clubs. They were shipped within four days overseas to Europe.
- Excellent materials (e.g. Graffaloy or Aldila Shafts and Lamkin Grips)
- Very Good custom fitting tool, even ladies with small glove size will find the right grips. You can even choose upright degrees
- Shipping is very fast and the costs are quite low for shipping to Europe (around \$30). Free domestic shipping in the USA for orders over \$99

[Pinemeadow Golf Clubs](#)

PinemeadowGolf.com is the electronic commerce site for Pinemeadow Golf Products, Inc., located in Portland, Oregon. One of the leading Clone Golf Club manufacturers that sells to Golf Players around the world. They produce hundred of thousands of Golf Clubs every year and are one of the leading custom fitting Golf producers.

Pros:

- The industry leaders with many years of experience
- Good quality
- Always the latest products
- The Custom Fitting Wizard is easy to handle and provides good results.
- Very good and fast Customer Service
- No shipping costs for order of over \$150 in Continental USA

Cons:

- Relatively high shipping costs to Europe (approx. \$50). We recommend to **buy with a friend (or two or three) or use bigger orders**. The cost of international shipping is much less expensive for larger shipments. This can bring your shipping cost down very fast.

How good are Clone Golf Clubs – Our Customers Reviews

On our site <http://www.golf-equipment-advisor.com/clone-golf-club-reviews.html> you have the opportunity to read Clone Golf Club Reviews for nearly all models. You can also provide your feedback based on your experience with Clone Golf Clubs and rate them between 5 (best) and 1 (worst).

In general we receive very good feedback and most of the people are more than happy with their Clone Golf Clubs. Here some of the latest reviews:

Turbo XL 6 Steel Plus Irons (compare to Callaway Steelhead X-16)

Karin just ordered the Turbo XL 6 Steel Plus Irons from GigaGolf.com last week. She chose Graffaloy Ultralite Attack Lady Shafts (-1 inch from standard length) and small Glove Lady Grips from Lamkin. The Clubs were delivered 4 business days later to Europe, which is very fast. Karin gained 20 yards in length with the new Clubs and is greatly impressed by the performance and error tolerance.

Rating: 5 (best)

Hugh from Ireland wrote: Just got the clubs three weeks ago, and have only played two rounds with them, but they were the best rounds I have played all year. Had been shooting low 90's all summer, but managed an 86, and an 82 so far with the new clubs. I am quite tall so the custom fitting is a nice feature. The clubs look and feel great, have added at least 10 yards to my distance with each club, and made the game a lot more enjoyable. I live in Ireland, and got the clubs within three days of ordering, so the service is second to none as well.

Rating: 5 (best)

Turbo Power V-91 (compare to Nike Slingshot)

Paul highly recommends this set of irons. Easy to hit, far and accurate. The shaft is very important. For him the UST Competition PHG 100, S-Flex was the perfect match. [GigaGolf](http://GigaGolf.com) offered him an absolute perfect service.

Overall Rating: 5 (best)

Professional Open 690 52 degree Gap Wedge (compare to Cleveland Wedges)

You must know that I love Cleveland Wedges. I play the 51, 56 and 60 degree 588 RTG Wedges from Cleveland. I ordered the Professional Open 690 52 degree Gap Wedge from [GigaGolf](http://GigaGolf.com). This Wedge performs at least the same as the four times more expensive Cleveland Wedges. I replaced my old 51 Dual Cleveland Wedges with my new 52 Professional Open Wedge.

Rating: 5 (best)

We're looking forward to receiving your feedback. Do you have similar experiences? Do you want to provide your feedback and rate your Clone Golf Clubs?

Square Drivers Golf - A Revolution Or Marketing Hype?

Discover The Truth About The New Square Drivers

You've probably heard about the new square drivers. Everyone's talking about them this month. But will they be talking about them in 6 months? Time will tell. But here's the facts on the technology behind them and what they mean to your game.

The idea behind the technology is that when you move the weight in the club head away from the club face you create a more stable golf club that won't twist on mishits. This is called greater **Moment of Inertia** (MOI). Greater MOI should lead to more stability and theoretically make the ball go further and straighter. I guess you could say **manufacturers have gone to extremes** with the theory and this new square design.

One reason manufactures have gone this direction is because the USGA has put a limit on head size and the rebound effect of the club face. The head has been **limited to 5" by 5"**. That means the last place manufacturers have to move weight to are the corners of the club. The face is already relatively square **so the back corners are what's left**. Thus the square headed drivers.

Both Callaway and Nike have already come out with clubs using this concept. Nike has the SQ Sumo and Callaway has the FT-i. Not many pros are using them although K.J. Choi won with the Sumo last fall. We haven't heard if Tiger, a Nike endorsee, will be using the Sumo. Should be interesting to see. **Many pros are not using them because they say they go too straight**. Thankfully many of us "normal" golfers won't have that problem.

Component **clubmaker Tom Wishon**, who wrote the book, "The Search For The Perfect Golf Club," wonders if this square technology and the chase for high MOI is really another type of chase...to win the golfer's dollar.

Wishon said since golf companies have hit the limits for face rebound speed and head size, now the race will be on to figure out who can get the MOI to the specified limit. But **he wonders if golfers who already have drivers that have a reasonable high MOI currently will notice much of a difference** with the new geometrically challenged breed of clubs.

However, Golf Digest in its recent club test gave the new square drivers high marks. It gave the Callaway an Editors Choice award and also ranked the Sumo highly. One Golf Digest tester said about the Sumo..."It has a nice high ball flight...Better players would rate it a 6 out of 10, but high-handicappers might like it." What that says to me is it's straight and long but might have too high of a ball flight for a really fast swinging golfer. I think us normal golfers will take straight and long anyway.

How To Save Big Money With High Quality Clone Golf Clubs

The Sumo has been reviewed on some golf forums. On GolfMagic.com, Bob Warters and his buddies **took the Sumo and a clone version out for a test ride**. They said all the clubs were long and straight and might actually live up to the hype. In particular he mentioned..."It's not perhaps what a leading manufacturer like Nike Golf would want to hear, but first impressions comparing the company's latest SasQuatch Sumo 2 (square-headed) drivers and a cheaper copy - the [Turbo Power XQ MUTO 460Ti](#) - **detected little difference in performance.**" With the new brand drivers selling for between \$400 and \$500 dollars and the clone selling for under \$100 it makes you wonder if all those endorsement dollars are getting a little out of hand. I guess that's a discussion for another time.

So it looks like the technology has promise. The only way to know for sure it to give it a try. GigaGolf offers the above [XQ MUTO](#) for \$99. It's technology is based on the Nike Sumo. **GigaGolf offers the MUTO with a top-of-the-line shaft and grip.** Might be worth a try.

Well get ready golfers. The square headed drivers are here and you'll get to see if they are worth the money and the hype. Come back here often and we'll keep you up to date on how they work out.
